

AMBA ONLINE SEMINAR

HIGH-SPEED MACHINING – THE POINT OF CUT PERSPECTIVE

FEBRUARY 3, 2010

10:00am-11:30am	Pacific
11:00am-12:30pm	Mountain
12:00pm-1:30pm	Central
1:00pm – 2:30pm	Eastern

THIS WEBINAR WILL ADDRESS:

- **HOW TO USE YOUR TOOLING TO MAXIMIZE PRODUCTIVITY**
- **WHAT TO LOOK FOR IN NEW HSM TECHNOLOGY**
- **HOW TO VIEW HSM HOLISTICALLY TO ACHIEVE THE HIGHEST RESULTS**

The
HSM Point
of Cut
Perspective
can add
thousands
to your
bottom-line!

How does an Online Seminar work?

- Listen to the Speaker over the phone (800# - no toll charges) while viewing the presentation slides over the internet.
- Interact live with the Speaker by asking questions over the phone or by typing in your questions.
- If you have a speaker phone and an LCD projector you can train an unlimited number of employees in your conference room.
- Instructions for connecting to the audio and internet

This webinar will introduce the learner to a new approach to understanding High-Speed Machining.

Learn how viewing the machining process from the point of cut can help you increase your productivity and reduce costly maintenance and rework.

Instead of classifying HSM as an arbitrary spindle RPM or machine feed-rate. Ryan Pohl, of Expert Tech will look at the process as whole, and discuss how seemingly unimportant variables can either make or break your process efficiency.

This session will be excellent for all people involved in the CNC operations at your company; from the people responsible for purchasing CNC equipment and tooling to the machinists themselves.

Benefits of an Online Seminar:

- No time out of the office
- No traveling expenses
- One site educates unlimited number of employees

Limited space is available for this FREE webinar! Register today to hold your spot!
