

# AMBA ONLINE SEMINAR

## ENHANCING MOLD PERFORMANCE WITH MOLD SURFACE TREATMENTS

**JANUARY 20, 2010**

10:00am-11:00am	Pacific
11:00am-12:00pm	Mountain
12:00pm-1:00pm	Central
1:00pm - 2:00pm	Eastern

### THIS WEBINAR WILL ADDRESS:

- **A WIDE RANGE OF COMPOSITE COATING TECHNOLOGIES**
- **THE ADVANTAGES OF TREATING MOLD SURFACES WITH COMPOSITE COATINGS**

### What are mold surface treatments?

Mold surfaces are inherently precise. Treatments or coatings onto mold surfaces must be equally precise but can provide specific properties essential to the function and lifetime of the mold as well as the quality of the molded product.

Michael Feldstein of Surface Technology, Inc., will present this webinar to show you the performance and economical benefits of using certain advanced mold and insert steel surface treatments.

Composite electroless coatings provide a synergy between a metal alloy matrix and fine particles of many types of materials, including hard, lubricating, release, frictional, heat transfer, thermal insulation, corrosion resistance, wear indication, authentication., and other properties. This webinar will explain the coating technology and its utility in mold and insert surfaces.

### How does an Online Seminar work?

- Listen to the Speaker over the phone (800# - no toll charges) while viewing the presentation slides over the internet.
- Interact live with the Speaker by asking questions over the phone or by typing in your questions.
- If you have a speaker phone and an LCD projector you can train an unlimited number of employees in your conference room.
- Instructions for connecting to the audio and internet

### Benefits of an Online Seminar:

- No time out of the office
- No traveling expenses
- One site educates unlimited number of employees

**Limited space is available for this FREE webinar! Register today to hold your spot!**
